- : About the Company : - *Brainvire Infotech Pvt Ltd*

Brainvire has fueled Fortune 500 companies and startups.

Its core expertise resides in Industry 4.0 technologies like Artificial Intelligence, IoT, Machine Learning, Cloud Computing, and Blockchain. Brainvire portfolio includes companies like Walt Disney, Alghanim Industries, Landmark Group, EagleHills, Times of India, Entrepreneur, Micromo, Havells, BottleRocket, and FreshDirect. Brainvire deals with open-source frameworks like Node.js, Python, PHP, and many premium Microsoft solutions.

With over 11 international locations, 800+ workforce and over 1500+ successful implementations, Brainvire has alliances with industry leaders

like Microsoft, Odoo, SAP, Magento, Google, and AWS. Brainvire's popular products include eUnagi, inKnowledge, AuroCRM, and Control ERP, to name a few. Brainvire is committed to offering time-tested contribution by innovation in the field of Information technology, that helps us create paradigm shifts in the market by building products and services that take the industry towards a better future.

Project Abstract

Developed an "Online Bus Booking System" with HTML, CSS, and JavaScript frontend, complemented by PHP backend and MySQL database. The user-friendly site streamlines bus reservations, ensuring optimal viewing with responsive design. JavaScript enables real-time updates, while PHP handles data processing and user authentication, supported by efficient MySQL database operations.

Domain Introduction

- PHP (Hypertext Preprocessor) is an open-source server-side scripting language.
- Widely used for web development since its creation by Rasmus Lerdorf in 1994.
- Powers dynamic websites and web applications.
- Features cross-platform compatibility.
- Seamlessly integrates with web servers and databases.
- Extensible through frameworks like Laravel and Symfony.
- Supported by a large community.
- Versatile, used for web development, command-line scripting, and data processing.
- Emphasizes performance and security.
- Popular choice for developers seeking flexibility and scalability in online solutions.
